Contributive teammate

Attentive listener

Resourceful

Flexible

PROFILE

I'm a passionate Frontend Developer with over 9 years of experience crafting dynamic, user-friendly web applications. My expertise lies in building robust solutions with ReactJS, TypeScript, Redux, Styled Components, Material-UI, and AWS.

I am also proficient in backend development, using languages such as Nodejs and .net, as well as in the application of unit tests and deployment processes.

I thrive on turning complex problems into intuitive interfaces that enhance user experience. Previously, I've successfully managed IT operations, coordinated teams, and even shared my knowledge as a web development instructor, teaching HTML, CSS, JavaScript, and PHP. These experiences sharpened my communication skills and deepened my understanding of effective teamwork.

Always eager to learn, I've traveled and lived across multiple continents, gaining diverse perspectives and continuously improving my English proficiency. Currently based in North Atlanta, GA, I'm excited about new challenges and opportunities to grow and make meaningful contributions to innovative projects.

PROFESSIONAL EXPERIENCE

Full Stack Engineer

Ago.2024 - Present

Louvershop, Gainesville, GA

- Organized and optimized website structure to enhance user experience, ensuring accurate and up-to-date information across various platforms.
- Performed regular maintenance on company systems, ensuring smooth functionality and timely updates. Managed bug fixes, troubleshooting, and system enhancements to optimize performance
- Helped coding and implement RESTful API, integrating services and ensuring seamless communication between frontend and backend systems. Documented APIs for ease of use by development teams.
- Led the development and lifecycle management of IT products, getting concept to prototype. Managed the product roadmap, aligning features with business goals and user needs.

Full Stack Engineer

Nov. 2023 – Ago. 2024

Future Coders, Duluth, GA

- Designed and developed a dynamic institutional website with user data collection capabilities, integrating a robust database for efficient information storage and retrieval.
- Instructed and mentored children aged 5-11 in programming fundamentals using LEGO robotics, fostering their creativity and technical skills through hands-on learning.
- Led students in collaborative projects, emphasizing teamwork and strategic planning to achieve targeted outcomes, enhancing their problem-solving and cooperative abilities.

Software Engineer

Apr. 2022 – May 2023

GFT GROUP, Remote

- Served as a Mid-Level Frontend Engineer, contributing to the development and optimization of user interfaces for high-traffic applications.
- Spearheaded the implementation of open-insurance solutions at a major insurance company, utilizing ReactJs, NodeJs, and form libraries including React Hook Form, Formik, and Yup to enhance form handling and validation.

PROFESSIONAL EXPERIENCE

Freelance Software Engineer

Aug. 2019 – Feb. 2021

Workana, Remote

- Engaged in diverse application and web development projects for a wide range of clients, delivering customized solutions to meet unique business needs.
- Developed an administrative dashboard for a medical company, enabling secure and efficient transmission of critical patient information to hospitals.
- Collaborated with ATHEM to create a comprehensive new website for selling materials, courses, and training. Redesigned the company's logo and conducted JavaScript coding lessons for adults with military backgrounds.
- Partnered with the gaming company, VIDGI, to develop their website and enhance their in-game betting system, improving user engagement and functionality.
- Created a website for a soccer team, integrating backend analytics to provide real-time data and insights on their performance and winning probabilities.

IT Coordinator

Jul 2013 – Apr 2019

Administration Secretariat, Bahia, Brazil

- Coordinated the daily operations and ensured exceptional service for an average of 400 clients per day, optimizing customer flow and satisfaction.
- Efficiently managed employee rotations, ensuring optimal staffing levels and maintaining high service standards.
- Prioritized service quality and conflict resolution, enhancing overall customer experience and satisfaction.
- Maintained and optimized web systems utilizing PHP, HTML, CSS, and JavaScript, ensuring seamless functionality and user experience.
- Assisted in developing a queuing system that assigned numbers to customers and tracked service times, providing real-time data for efficient workflow management and enhanced customer service.

VOLUNTEER WORK

Coding Teacher

Jan. 2024 - Present

Notre Dame Academy, Duluth, Ga

- Designed and implemented engaging coding lessons for children aged 5-11, fostering early interest and skills in programming.
- Contributed to creating a stimulating and well-structured learning environment where students could practice and develop fundamental coding skills.
- Collaborated with a local teacher to deliver coding lessons, establishing strong rapport with students and enhancing their learning experience.
